MAGNOLIA HEATING AND COOLING 2021 UPDATE FOR OUR CUSTOMERS

The COVID-19 pandemic has affected all manufacturing companies in some way. There are various industries that are experiencing shortages throughout the country that are affecting the average American. From a shortage of cars at your local dealership, to chicken wings at your favorite restaurant, and even HVAC comfort equipment.

The reasons for this include supply chain issues, a shortage of materials, and less manufacturing jobs which have all slowed the production of this equipment.

Luckily, the owner of **Magnolia Heating & Cooling** is ahead of this problem. With the help of Daikin, he has ordered plenty of products and is ready to start the installation process now. One of our most recommended products is the Daikin Fit system.

Daikin has new, innovative systems that are completely electric. They use advanced technology to ensure high efficiency and total comfort within your home or office. They are also extremely quiet and use less electricity than a conventional system.

While Daikin may be an unfamiliar company for the average American, Daikin was founded in 1924 and is the leading Air Conditioning manufacturer worldwide!

NATURAL ALL PURPOSE CLEANER

Ingredients:

- 1 Cup – Vinegar
- 1 TBS – Baking Soda
- 2 Cups – Water
- 5 Drops or more of your favorite essential oils
- Reusable Spray Bottle

Instructions: Mix baking soda and vinegar together in the spray bottle. Watch out, because they will fizz up. Then, add remainder ingredients and start cleaning! Make sure not to use on marble or wood.

Fun Facts – Did you know: Before HVAC systems, it was thought that summers were too hot for children to learn, which is why we have Summer Break now.

Good to Know – Homeowners should change their filters every 1-2 months, especially if they have pets who live inside.
